

SMART FUEL MANAGEMENT

The **Veridapt AdaptMAC** is the pinnacle of our fuel management offerings, engineered for high-volume industrial environments where total control and security are non-negotiable. As a leader in smart, scalable turnkey solutions, Orca utilizes Veridapt technology to provide absolute visibility over your fuel supply chain.

FEATURE

DETAILS

Users	Unlimited user access via tags, key cards or access pins.
Transactions	Unlimited transactions saved to cloud.
Management	Real time with live tracking every 3~5 seconds.
Storage	Unlimited cloud storage with encrypted data.
Monitoring	24HR live monitoring of tanks, users, nozzles, & transactions.
Compatibility	Monitors any type of tank, size & pump system.
Integration	Advance API integration into any accounting system.

Key Capabilities

- ✓ **Full Turnkey Security:** Authorize transactions through RFID tags, HID cards, or secure biometric integration to eliminate fuel theft.
- ✓ **Detailed Asset Tracking:** Automatically prompts for mandatory inputs such as Odometer/Hourmeter readings and specific Job codes.
- ✓ **Precision Metering:** Integrates with high-accuracy flow meters to monitor every liter dispensed, pumped, and consumed.
- ✓ **Automated Inventory:** Real-time tank gauging allows the system to monitor stock levels and automatically notify suppliers.

Strategic Data Reporting

Centralized Management:

Track multiple remote sites & on-road transactions through a secure web portal.

Comprehensive Analytics:

Generate executive reports in over 50 formats (PDF, Excel, CSV).

Inventory Reconciliation:

Identify and mitigate fuel losses immediately.

Streamlined operations.

Real-time reconciliation.

Greater cost savings.

Accurate emissions reporting.
